

Siip Initialization Tests

1. **Test:** Initialize Blockchain

Procedure:

- a. Run `~/siip/substrate-node> make run`.
- b. Run `~/siip/substrate-ui> yarn start`
- c. Open siip UI in browser.

Expected Result:

- The Siip UI will display an initial current block number of 0.
- The Siip UI will display a list of account names and corresponding account balances.

Error Conditions:

- a. `~/siip/` failed to build.
Siip UI does not run-on browser.

2. **Test:** Initialize Blockchain

Procedure:

- a. Run `~/siip/substrate-node> make run`.
- b. Run `~/siip/substrate-ui> yarn`.
- c. Open siip UI in browser.

Expected Result:

- The Siip UI will display an initial current block number of 0.
- The Siip UI will display a list of account names and corresponding account balances.

Error Conditions:

- b. `~/siip/` failed to build.
Siip UI does not run on browser.
- c. Email is already taken
Result: generic error message appears alerting you that the email is already associated with an account
